PROJECT JUSTIFICATION

The traffic signal systems listed above are ranked in priority based on the highest pedestrian/vehicle traffic age and reoccurring maintenance issues. These signal warrant replacement for the following reasons: 1. Bring the signals up to the current approved standards which assist with the safe and efficient movement of vehicles and pedestrians. 2. Beautification of the city by converting the current span wires that the signals currently hang to new mast arms. 3. Improved infrastructure resilience when there is a storm or hurricane. Because of this we can have the traffic signals back in operation in a shorter amount of time after a storm. 4. Reduce maintenance cost and emergency call outs for service.
