**Status:** Draft

**In Control:** Public Works

**File Type:** Agenda Item

### Title

Consider and take action on a resolution authorizing an Interlocal Agreement with Galveston County Health District for certain water pollution control and abatement services in an amount not to exceed \$32,035.56 (Director of Public Works)

### ..Background:

Approval of this resolution will authorize an Interlocal Agreement with the Galveston County Health District (GCHD) for certain water pollution control and abatement services.

The City of League City and the Galveston County Health District (GCHD) participates in a contract wherein water pollution control and abatement services are provided to the City by GCHD. As part of this contract GCHD investigates, documents, and assists in resolving water quality (stream, not potable) related complaints within the jurisdictional limits of League City. GCHD conducts one annual comprehensive and three scheduled inspections of the City's Dallas Salmon Wastewater Treatment Plant (DSWWTP) and Southwest Water Reclamation Facility (SWWRF). These inspections are consistent with current Texas Commission of Environmental Quality (TCEQ) inspection protocol for wastewater treatment facilities and are helpful in maintaining discharge permit requirements. The contract also provides as-needed investigations of non-point source water pollution incidents and surface water sampling (collect and lab testing) of local waterways in the support of the City's MS4 stormwater permit and other water quality studies. Other participating entities include, Jamaica Beach, La Marque, Hitchcock, Santa Fe, Friendswood, Texas City, Dickinson, and Bayou Vista.

The proposed contract cost is based on a per capita value of \$0.33, utilizing the 2020 population census for League City. The 2020 census identified a population of 114,392, representing an increase of 42,245 from the 2010 census. In recognition of the substantial cost impact to participating entities GCHD proposes an incremental implementation over the next few years.

The proposed contract cost of \$35,757.56 represents a 9% overall increase from the 2021/2022 contract, staff further reduced the increase by eliminating two cycles of surface water sampling in the amount of \$3,722, creating a proposed 2022/2023 contract value of \$32,035.56, representing a \$530 cost reduction.

Original 21/22: \$32,565.04

Proposed 22/23: \$35,757.56

Reduced Scope: -\$3,722 (two sample cycles)

Adjusted 22/23: \$32,035.56

The annual cost of the program is \$32,035.56. The contract is funded equally between the Wastewater Department and the Streets and Stormwater Department. The contract will run from October 1, 2022, through September 30, 2023. Adequate funding has been allocated and noted below.
