Title

Consider and take action to enter into a professional services agreement with ABCOM Technical Services, Inc. for the Storm Water Improvements 2012-2013 Project [DR1102] (Director of Engineering).

Staff recommends approval.

Background:

Staff solicited the proposal for the Storm Water Improvements 2012-2013 Project from ABCOM (ABCOM being a "short-listed" in the evaluation process of the RFP's received for the City's FY 2012-2016 CIP). ABCOM was short-listed primarily because of their successful performance on a prior City CIP drainage project (the Clear Creek Heights Channel Improvements project).

Per the City's FY 2012-2016 CIP, the Storm Water Improvements 2012-2013 Project (see attached CIP worksheets) was to include the design of the following four channels: (1) Interurban Channel North of FM 518; (2) Nottingham Ditch (between Calder Road and the Interurban Channel); (3) Nowport Channel North of FM 518; and (4) the Bradshaw Ditch. Design for all 4 channels was originally planned for 2012, with construction planned for 2013 and 2014.

Project scope for design has been increased to include environmental assessment to USACE standards and to meet Storm Water Pollution Prevention Plan Best Management Practices First Flush requirements. These design items were not included in the original project descriptions. With inclusion of these items to the project scope, staff proposes that two channels be designed in 2012 (Interurban North of FM 518 and Nottingham Ditch) and the remaining two be designed in 2013. Proposed construction would still be split between 2013 and 2014, based on updated construction cost estimates resulting from design efforts.

ABCOM proposes to provide engineering services for the Interurban North of FM 518 and the Nottingham Ditch for \$320,451.00, an increase of \$20,451 from the budgeted amount of \$300,000 as illustrated in the attached CIP worksheet. This difference is to be absorbed by cost under-runs in other CIP projects. A detailed cost breakdown for their services is provided in their proposal included as part of the attached proposed professional services agreement.

Title

Consider and take action to amend the professional services agreement with AECOM Technical Services, Inc. for the Storm Water Improvements 2012-2013 Project [DR1102] (Assistant City Manager, Public Works)

Staff recommends approval.

Background:

On April 22, 2012, Council approved the Professional Services Agreement with AECOM Technical Services, Inc. for restoration of the Interurban Channel (north of FM 517), and Nottingham Ditch (Calder Rd to the Interurban Channel). The first phase of the approved services included the development of a Preliminary Engineering Report (PER) to evaluate the physical properties of the drainage features and develop design alternatives.

The PER identified environmental issues (wetlands and tidal influence) in both streams which will be impacted and require mitigation submittal to the United States Army Corp of Engineers for approval. This level of mitigation was not anticipated in the original proposal; therefore, the agreement should be amended to provide for the additional effort.

Attached is AECOM's description of the environmental permitting process and their permitting process proposal for that effort. Staff recommends approval of option one, both channels, in the amount of \$61,100, which will also add 12-18 months to the design permitting process.
