PROJECT DESCRIPTION

FY2025: (1) Design Landing Lift Station Rehab for improved reliability and safety \$150,000; (2) Design of Constellation LS Rehab submersible conversion for improved reliability and safety \$123,750
FY2026: (1) Design Meadowbend STP LS Submersible Conversion \$195,000 (2) Construct Landing and Constellation LS improvements \$ 800,000
FY2027: (1) Construct Meadowbend STP LS Submersible Conversion \$1,300,000 (2) Design Dove Meadows #1 & #2 LS Submersible lift pump conversion \$135,000.
FY2028: (1) Construct Dove Meadows #1 & #2 LS Submersible lift pump conversion \$900,000; (2) Design Meadow Parkway LS Rehabilitation \$127,500
FY2029: (1) Construct Meadow Parkway LS Rehabilitation \$850,000

PROJECT JUSTIFICATION

The majority of the City's lift stations have seen capacity improvements and rehabilitation activity in past years, through the City's on-going Capital Improvement Program and O&M funded projects. All the above-mentioned sites were constructed in the early eighties and are critical stations serving large areas. Although improvements have occurred through past years the some of the pumps and associated piping will have been in service for close to forty years at the time of proposed construction. Dry Pit lift station designs from this era had few considerations for Operation & Maintenance efficiencies and/or related safety issues. SS 1 & 2, Glen Cove, and East Main lift stations have been subjected to flooding of dry pits during tropical weather events of the past where the complete function of the facility was lost until electrical, and pumps could be restored. These proposed conversion improvements will enhance operability and safety of these sites for the long-term future.
