**RE: Recommendation of Award for RE2101 – TxDOT Landscape Improvements Project – Irrigation Meter Installation**

The Project Management Office reached out to six plumbing companies for quotes to install City-supplied (19) 2” meters, boxes, valves with associated materials and (3) 1” meters, boxes, and valves with associated materials. Because of the type of installation, we received quotes from (3) qualified contractors and the remaining (3) plumbing contractors were not qualified to perform the work.

**Summary of bids:**

<b>Contractor:</b>	<b>Total Price:</b>
Mickie Service Company	\$85,400.00
SRS Construction, LLC	\$128,750.00
Greensage Services, LLC	\$269,303.90

Mickie Service Company has performed responsible and quality work for the City of League City on previous PO-based jobs and therefore the Project Management Office recommends them to be awarded the construction contract for the Irrigation Meter Installation.

The contract is set at 250 days to complete as the City is still in process of receiving meters, boxes, and valves due to supply chain delays.

Scott Tuma, PMP  
Sr. Project Manager
