

MEMORANDUM

To: John Baumgartner, P.E.
From: Linc Wright, P.E.
Subject: Wakefield Drive - Speed Hump Request
Date: January 27, 2014
Cc:

Based upon a citizen request, speed studies were conducted on Wakefield Drive in the northern part of the City just west of SH 3. The request was to evaluate the need for speed humps. Speed studies were conducted in the northbound and southbound lanes of Wakefield Drive midblock between SH 3 and.

Wakefield Drive (not posted, assumed 30 mph)

Northbound 85th percentile speed – 35 mph

Southbound 85th percentile speed – 36 mph

It was determined that the 85th percentile speeds do meet the speed hump policy requirement of 35 mph. Because there is no HOA or Civic Association the residents have provided a signed petition by home owners along Wakefield Drive that represents 60% of the home owners in favor of the speed humps. Based upon the 85th percentile speeds which meets the guidelines of requirements of the Speed Hump Policy and the signed petition, it is recommended that a speed hump be installed.
