Alan Phillips
Purchasing Manager
City of League City
300 W. Walker
League City, TX 77573

Dear Mr. Phillips:

3M is the developer and sole manufacturer of the 3M™ Intelligent Return and Sorter System. 3M is the developer and sole manufacturer of the 3M™ RFID System. We have patents and patents pending on certain parts of this system technology. This system is the only system that integrates with 3M™ Command Center Software that enables customers to monitor and provide reports for the entire 3M RFID System including 3M™ Intelligent Return and Sorter System.

Some of the reasons our system would be better suited for City of League city libraries include:
- Similar interface and software as your RFID system
- 1200 items inducted per hour per induction point to meet your peak times
- We guarantee our products will perform with our RFID tags
- If you do not choose the 3M Intelligent Return and Sorter, you will have to purchase a different central management software system. 3M's Command Center Software works with 3M Intelligent Returns, SelfChecks and Detection Gates.
- Service. 3M has the most trained and authorized service technicians in Texas. This includes three less than an hour from League City and an additional five others.

Please contact Shawn Brumley at 940-367-9738 or scbrumley@mmm.com should you have any questions.

Thank you for your interest in the 3M Automated Material Handling Systems for Libraries. If there are any further questions or problems, please feel free to contact us.

Sincerely,

3M

Matthew Bellamy
NA Sales and Marketing Manager - Library Systems
