

UTMB Proposal for Narrow Network Services for City of League City (Client)

Services Offered:

- 3 Hospitals located in Galveston, League City, and Angleton offering Inpatient, Outpatient, Emergency
- Primary Care and Specialty Physician services are geographically dispersed throughout Galveston & Brazoria Counties (Full range of pediatric through geriatric services available)
- Regional Urgent Care services provided M-F from 6PM – 10PM and Sat – Sun from 10AM – 10PM. Locations in Alvin, Angleton, League City, Texas City, and Galveston

Focused Emphasis on Specific Quality Metrics:

- For employees/dependents of client attributed to UTMB, targeted focus is placed on achieving specific quality metrics. These include, but are not limited to: mammography screening, well child visits, Hemoglobin A1c (Diabetes), Pharyngitis for children, Depression, Readmissions, and Patient Satisfaction.

Benefit Plan Design:

- Consider dropping the coinsurance to 10% or 15% vs 20% to encourage more individuals to use UTMB as a preferred provider
- Urgent Care at UTMB is the same copay as the Primary Care Copay in any group benefit plan as urgent care is billed as a primary care physician office visit
- Consider adding a maternity benefit at a reduced amount if using a UTMB OB/Gyn and UTMB facility for OB care. All childbirth education classes provided at no charge to client members.
- Consider adding a pre-authorization for MR/CT and any specialty lab services such as genetic testing or amniocentesis
- All other benefit plan designs as outlined on the Summary of Benefits are acceptable to UTMB

Proposal:

- With a minimum 2 year commitment from City of League City to utilize UTMB as a preferred network option, UTMB will offer a 10% discount from the standard CIGNA fee schedule in exchange for being named the preferred network option within the employee benefit plan design
- UTMB offers an integrated electronic medical record. Unlike many health care organizations, this electronic medical record is available in all hospital facilities, outpatient areas and physician clinic offices. Wherever a patient accesses care within a UTMB facility or clinic, the same patient medical information is available at all locations.
- Competitive laboratory and imaging rates to encourage use of services at UTMB to ensure timely results are provided and immediately incorporated into the patient electronic medical record
- After hours appointments for MRI/CT at the League City location
- 24 hour Access to Care Nurse Triage phone line (provides routine medical advice and schedules physician clinic appointments during non-clinic hours)
- For collaboration and discussion between UTMB and the client, UTMB will consider offering extended hours with designated appointment slots at specific primary care clinics in the League City area if desired by the client.
