Professional Experience

A construction professional with six years' in field, management and administrative experience working for his family's company, Architectural Covers & Enclosures. After graduating Middle Tennessee State University, I moved from Tennessee to Houston. My transition from in field work to inspection and plan review services began as a permit tech for the City of Bellaire. Here I helped to re-shape, re-organize, and create efficiency for parts of the day to day workload. Projects included a re-vamping of internal document structure, moving parts of the work processes from paper to digital and in-house plan re-organization. The period of my employment with the City of Bellaire also provided me with the working knowledge of how cities operate and function with community development projects. This knowledge included residential, commercial and trade exposure. Shortly after my period of employment with the City of Bellaire ended, I was scouted by BBG Consulting, Inc. for my work at the city, strong promise and adaptability. Here, I have quickly begun acquiring hands on experience through quality work with residential inspections and plan review.
