GENERAL OVERVIEW & SCOPE OF SERVICES

General Overview

This proposal is based on our understanding of the project as discussed in our previous meetings and conversations. The water lines needing replacement were identified by City staff based on lines deemed a high priority for replacement or upgrades, due to aged and deteriorated water lines, undersized small diameter water lines, on-going maintenance issues, and pipe material types.

This proposal consists of providing engineering design and construction phase services associated with the replacement of existing water lines in the Newport, Bayou Brae, and Glen Cove subdivisions of the City. The total footage of water lines to be replaced in the three subdivision areas is approximately 36,400 L.F. Based on preliminary cost estimates performed by ARKK, the estimated construction cost for performing the replacements is \$3.3 million. The following is a summary of work proposed for the project:

Water Line Replacement Project in Newport, Bayou Brae, and Glen Cove subdivisions

This project includes the replacement of water distribution lines located in the following subdivisions in the City of League City. The subdivisions and the approximate footages and sizes of water lines to be replaced include:

- 11,800 L.F. of 8" water lines in Newport Subdivision – Estimated Construction Cost of \$1,062,000. This project will complete the replacement of the water lines in the Newport subdivision.
- 6,100 L.F. of 8" water lines in Bayou Brae Subdivision – Estimated Construction Cost of \$549,000
- 18,500 L.F. of 8" waterlines in Glen Cove Subdivision – Estimated Construction Cost of \$1,665,000

ARKK Engineers will divide the project into two parts, and will prepare two construction contract bid packages (two sets of plans and specifications) encompassing the design of the water lines located within Newport, Bayou Brae, and Glen Cove subdivisions of the City. The following is a summary of the work anticipated to be performed as part of the two packages:

- **Package 1** will include the replacement of approximately **17,900 linear feet** of existing waterlines of varying sizes with 8" water lines located in the Newport and Bayou Brae subdivisions. The estimated construction cost is \$1.61 million.
- **Package 2** will include the replacement of approximately **18,500 linear feet** of existing water lines of varying sizes with 8" water lines located in the Glen Cove subdivision. The estimated construction cost is \$1.66 million.

It is the City's desire that ARKK complete the design, with bidding and construction to follow immediately or based on budget availability in the subsequent fiscal years.

During the construction phase of the two project packages, the City of League City will provide a project site representative to observe the progress of construction. Therefore, construction inspection services by ARKK Engineers' personnel are not included in the engineering scope of services for the project. However, a budget for increased engineering project support to assist and aid the City's project site representative during construction is included in this proposal. This proposal does not include performing any environmental studies for the project area. Construction materials testing services are also not included, as we understand that the City will contract directly with a material testing firm during construction.

This proposal addresses the engineering services ARKK Engineers will provide the City during the design and construction phases, including such services as topographic surveying, geotechnical engineering, plan reproduction, and miscellaneous services that may be required for the project.

The City will be providing a site representative to observe the progress of work during construction.

- ARKK will not be responsible for the means, methods, techniques, sequences or procedures of construction selected by the Contractor(s) or the safety precautions and programs incident to the work of the Contractor(s). ARKK's effort will be directed toward providing a greater degree of confidence for the City that the completed work of Contractor(s) will conform to the Contract Documents, but ARKK will not be responsible for the failure of Contractor(s) to perform the work in accordance with the Contract Documents. During site visits and on the basis of on-site observations ARKK shall keep the City informed of the progress of the work, shall endeavor to guard the City against defects and deficiencies in such work and may disapprove or reject work failing to conform to the Contract Documents.

- Conduct approximately 34,320 linear feet of topographic survey for the water line replacement areas.

2. Geotechnical Services

- Obtain soil borings and geotechnical information on the project area. Provide a geotechnical engineering report summarizing the findings and recommendations.
- Due to the trenchless nature (limited excavation) of the proposed water line replacement (augered construction), soil borings will be taken across the project area at selected locations to provide an overall representation of project area's geotechnical conditions. A budget for performing 8 borings at an average depth of 10 feet per bore (total vertical footage is 80 V.F.) is included in this proposal. Soil boring data obtained for previous projects will also be utilized and included in this report.

- Utilize a subcontract geotechnical firm mutually agreeable to the City and ARKK.

3. Reproduction & Mileage
