| Reinvestment   | RE1702C    | Dickinson Ave Reconstruction   | Construction  | Delay due to relocation of Frontier Fiber | 0     | The section of new pavement between Beaumont Street and Walker Street was complete in late August. For the remaining section between Beaumont Street and Power Street, the main storm sewer line transitions under the northbound lanes began installation in early September with completion by the end of the month. While this work is being completed, the inlets on the southbound lanes will not function to full capacity and temporary pumping will be in place to prevent ponding on the roadway during rain events. Roadway excavation and new pavement for the last section between Beaumont Street and Power Street will follow. We are anticipating roadway completion in October with some general site work to follow.  |

|  | ST1501     | Turner/Butler Reconstruction   | Construction  | On Schedule                               | 100   | Concrete work began on Butler at League City Parkway the first week in October. The shift in construction phasing delayed the start of roadway paving, but now we should see consistent paving from Butler through one lane of Turner as more of the subgrade was completed and 95% of the underground work is complete. After completion of this project, a separate project will reconstruct the remainder of Turner (west of the roundabout) and the remainder of Butler (south of the roundabout) to widen and improve the roadway. Design for the next phase of construction will be submitted to Council for award in early 2021. (see above) The original timeline for the project was to be complete in October but now is anticipated for early to mid-December 2020. This delay was due to the need to provide alternate access out of Ervin St, which occurred on the front end of the project. |

With neighboring Cities, Counties and Government Agencies on board, the study has been progressing and project concepts are starting to be evaluated. Hydrologic and Hydraulic analysis is being performed to accurately model the new Atlas 14 rainfall data and new development in the watersheds. The modeling is expected to be calibrated and completed in September of this year. Another round of public meetings will be held in October to discuss some ideas for projects and receive public input. The near term goal for all local entities to fast track some project options to submit an application for GLO funding in October is not viable as funding is focused on low income areas only. Due to this restriction, the project team is looking to apply for Federal & GLO funding (if scoring weights are different) in April 2021. The final study product will be complete in early 2021. |
