Consider and take action on a resolution adopting the 2019 Updated Water Conservation Plan for the City of League City to include a mandated five (5) year update (Director of Public Works)

Approval of this resolution provides compliance of the following mandate: The City's Water Conservation Plan must be updated every five years, as required by the Texas Commission on Environmental Quality (TCEQ). Rules for governing development of water conservation plans for public water suppliers are contained in Title 30, Part 1, Chapter 288, Subchapter A, and Rule 288.2 of the Texas Administrative Code. This proposed update represents water conservation activities from 2014 through 2018. This information is included in the attached plan and provides further definition of the plan's content.

### Key points of this plan are as follows:

#### Objectives of this Water Conservation Plan

- To reduce water consumption from the levels that would prevail without conservation efforts
- To reduce the loss and waste of water
- To improve efficiency in the use of water
- To encourage efficient outdoor water use
- To document the level of recycling and reuse in the water supply
- To extend the life of current water supplies by reducing the rate of growth in demand

#### Under the 2014 through 2018 plan the following objectives were achieved or are ongoing

- Sensus Iperl and Omni water meters. These meters continue to increase reliability and strengthen water accountability efforts, since their initial installation. New meters incorporate leak detection and notification capabilities
- Five-year average Per Capita Municipal Use was reduced from 122 gpcd to 115 gpcd, meeting the projected 2014 reduction goal
- Continued efforts to expand outreach efforts, that includes a water conservation mascot, Captain H2O, who accompanies the conservation team to local schools, daycares, public events, and utility-oriented training even
- The Dallas Salmon WWTP continues to provide Type 1 Reuse effluent for irrigation and produces 80 million to 200 million gallons annually
- Implemented successful Rain Barrel and Rebate Program selling 1,171 rain barrel kits and providing

\$11,125 in rebates during this time period

- Implemented increasing block water rates to encourage efficient large volume irrigation strategies

#### Potential Future Conservation Programs

- Landscape Water Conservation Measures - Consideration of mandatory twice per week year-round or seasonal watering
- Residential Toilet Replacement Program - Consideration of implementing ultra low flow toilet (ULFT) replacement rebate program, primarily targeting homes built prior to 1995
- Showerhead, Aerator, and Toilet Flapper Retrofit Program - Replacing old showerheads, kitchen and bathroom faucet aerators, and toilet flappers with newer more efficient models can achieve meaningful water savings
- Landscape Ordinances - Consideration to review and recommend changes to current ordinances that enhance water use efficacies
- Landscape and Irrigation System Incentives - Consideration of implementing landscape replacement programs and various irrigation system incentives
- Advanced Community Engagement - Consideration to engage the development and HOA community and free seminars
- Irrigation Design Criteria - Develop or revise design criteria to align with best management practices implemented in future irrigation incentive program
- Advanced Leak Detection and Repair - Consideration to contract advance leak detection technologies for a city-wide water loss evaluation

#### Five- and Ten-Year Water Conservation Goals:

<u>Description</u>	<u>Current Average (2014-2018)</u>	<u>5-Year (2024)</u>	<u>10-Year (2029)</u>
Total Per Capita Use (GPCD)	115	112	109
Residential Per Capita Use (GPCD)	72	70	69
Water Loss (GPCD)	13.3	12.3	10.9
Water Loss (Percentage)	12.0%	11.0%	9.0%
Infrastructure Leakage Index (ILI)	2.3	2.2	2.2

(Formulas and descriptions for above are referenced on page 5-1 of attached WCP)

The State granted an extension of the submittal deadline until October 1, 2019. We have communicated to TCEQ that the plan is a draft until formally approved by City Council.
