Title

Consider and take action on a resolution to approve the purchase of replacement network equipment for the Public Safety Building Data Center from Netsync in the amount of \$203,897. (Director of Information Technology)

..Background:

If approved, this item will allow the purchase to replace the core network equipment and firewall in the Public Safety Building; this equipment supports information technology functions across all City facilities.

The existing equipment was purchased in 2014 when the Public Safety Building was built. This equipment is nearing its end of support. It must be replaced by the end of the year to stay compliant with the Department of Public Safety, FBI, and Criminal Justice Information Systems.

A firewall is a crucial part of any network infrastructure that acts as a gatekeeper between our network and the outside world.

All City servers, facilities, traffic intersection cameras, and other security video feeds cameras are to connect to this building via fiber.

This equipment comes with three years of maintenance 24 hours, seven days with a 4-hour response time

Note: The existing equipment will be removed from our annual Cisco SmartNet maintenance contract at a savings of \$8,600

Netsync is on a State DIR Contract #DIR-TSO-4167
