City of Conroe	IH-45 At North Loop 336 Improvement	IH-45 at North Loop 336			This project is primarily intersection improvements at N Loop 336 and IH 45 Northbound and Southbound Frontage Roads that include minor roadway widening along N Loop 336, installation of a new traffic signal, and removal of some of the existing traffic signal items. The roadway work will involve modifications to the existing brick paver medians, channelized islands, and widening along the existing outer edge of roadway. The proposed traffic signal at the intersections of N Loop 336 and IH 45 Northbound and Southbound Frontage Roads will be mast arm configuration with a fully actuated traffic signal controller. The proposed traffic signal will utilize two of the existing mast arm poles and foundations. To operate both intersections with a single controller, conduit will be installed on the existing parapet wall along the bridge. Vehicle detection using radar and pedestrian detection are also included. This project requires ADA compliant wheelchair ramps, access pads and crosswalks per plans. Installation of signing and pavement markings are also included as part of this project.	\$1,525,778	305,156	\$152,578	N/A	\$1,525,778	C	2026	STBG
